

| Causal Task | Common Questions | Progress Notes | Tasks Pending |
|---------------------------|---|---|--|
| Effect Estimation | <ul style="list-style-type: none"> If we change X, how much will it cause Y to change? | I have now created a first draft (source code is in the repo) that will serve as an abstraction for the effect estimation pipeline. | <input type="checkbox"/> Testing <input type="checkbox"/> API Documentation |
| Attribution | <ul style="list-style-type: none"> Why did an event happen? How to explain an outcome? Which of my variables caused the anomaly? | No progress made here. | |
| Counterfactual estimation | <ul style="list-style-type: none"> What if X had been changed to a different value than its observed one? | No progress made here. | |
| Prediction | <ul style="list-style-type: none"> Given a new input with different input features, what will be the output? | No progress made here. | |
